Yes, it's a real product. We stopped selling it in 2019 and changed to the AH-SWI-P10-1. Link below to more information.

Hi thank you for that, but I'm working on a legacy project, and need the specifics on AH-SWI-P09-1. Was that a real product that was sold? If so can you give me any information on that part?

Good morning

That switch AH-SWI-P09-1 has been replaced with AH-SWI-P10-1. I provided a link below to one of our distributors, PDX RV Wholesale. There is a wiring diagram and additional information on the page as well.

"Hello, Im wondering if you can help me out. Part #AH-SWI-P09-1 (white) is referenced in your document AP-INSTR-03, but doesn't seem to exist, the other models #AH-SWI-P09-5/8(black,almond) do. Can you tell me if the white variant was ever made? Any information would be great, especially where I could purchase it and any install docs on it for wiring verification. "
